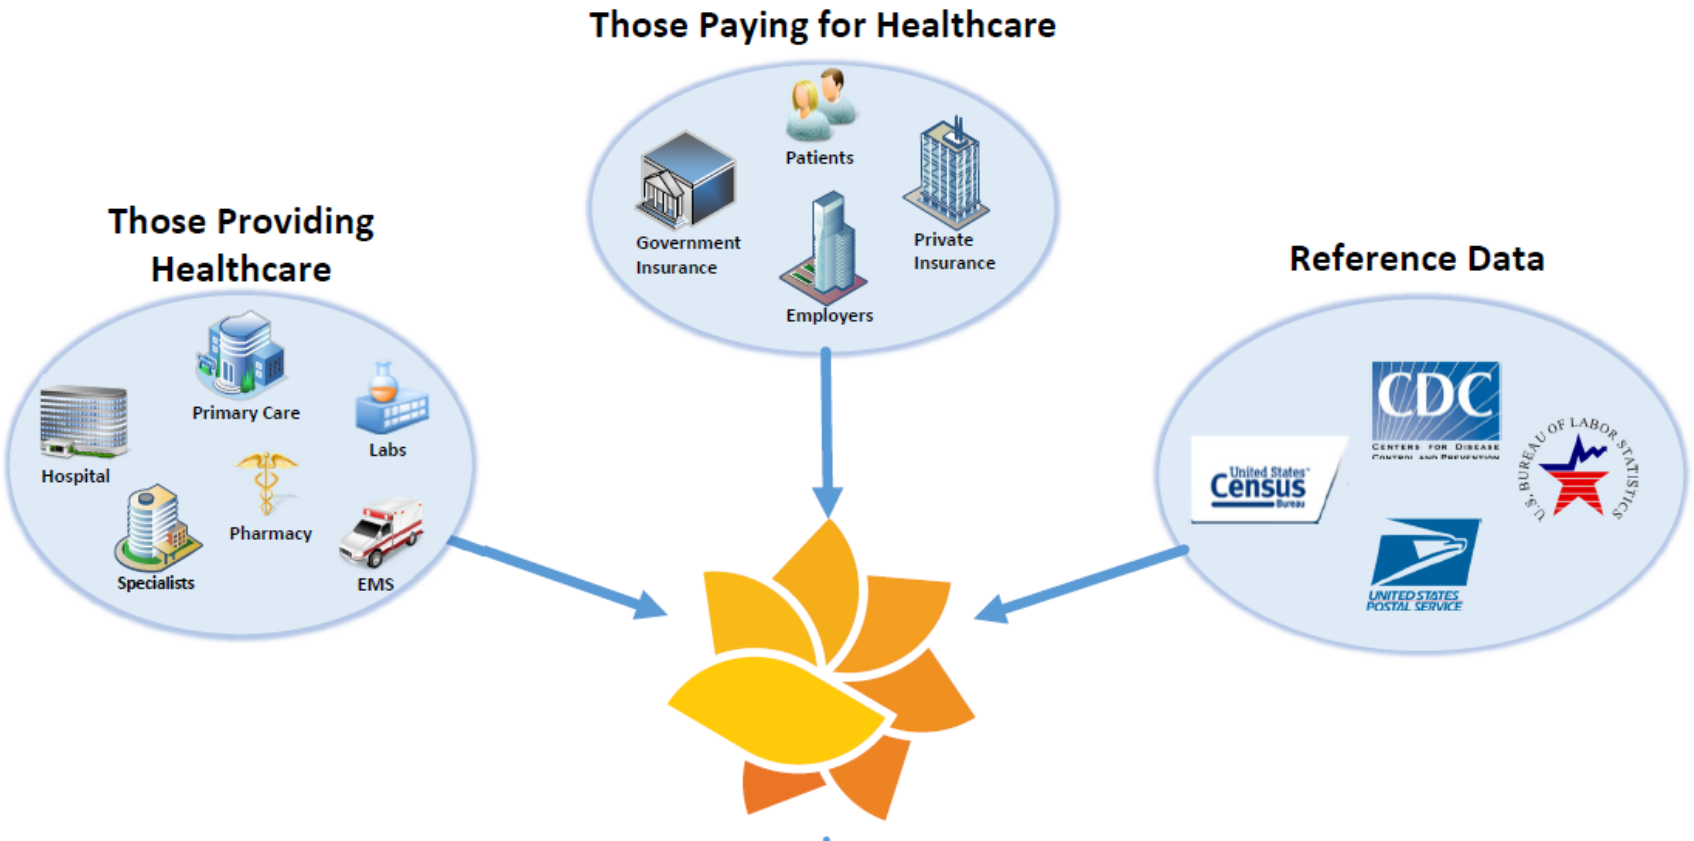
THE HEALTH COLLABORATIVE
Technology Powered by HealthBridge

healthLINC
CONNECT. CARE. COLLABORATE.

Technology Stack Replacement

April 2016



Share
Community wide view of patient data

Integrate
EHR data insertion and extraction

Notify
Timely delivery of patient events

Analyze
Provide actionable measurements of data

A Look Back in Time – 2000 AD

"Rough Draft" of human genome announced

PC's broke the 1Ghz barrier

HealthBridge
Better information. Better care. Better outcomes.

Clinical Messaging system goes live!

Current Software

- Architecture is dated and inflexible
- Product is “end of life” per vendor
- Does not support modern standards for CCD exchange, PDF/RTF documents, Web Services (FHIR, etc.)
- Lacks new service capability such as quality measurement

Current Functionality Comparison

Functionality Continuing

- “Inbox” portal view of results
- HL7 Results Delivery to EHR
- Fax Results Delivery
- Encounter Notification Service (ENS)

Functionality Not Continuing

- Auto print

Functionality

- Longitudinal Patient Record for:
  - Hospitals
  - Independents
  - Social Health Agencies
  - Long Term Care Facilities
  - Health Plans
- Query/Response
- Single Sign On Access
- Clinical Based Measures & Analytics
- Claims Based Measures & Analytics
- Clinical + Claims Based Measures & Analytics

The Ask of You

- Contribute data in the form of a C-CDA
  - Without this, there is no true community level picture of the patient
  - We are committed to assisting and negotiating with your vendors
- Patience
  - We will need to pause all new implementations very soon

Implementation Timeline

- Phase 1 (Like for Like) — Sept 2016
- Phase 2 — 2017
  - Community Portal
  - Quality Measures
